

Samiksha S

Software Engineer

Chennai, Tamil Nadu | +91 6379538228 | samikshasiva12@gmail.com | LinkedIn | LeetCode | Github

SUMMARY

M.Tech Computer Science student with hands-on experience in full-stack development through internship and academic projects. Skilled in Angular, Python, JavaScript, Node.js, REST APIs, SQL, Docker, and Google Cloud Platform (GCP). Knowledgeable in API development, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), and agile methodologies. Strong problem-solving, communication, and teamwork skills with a passion for building innovative, reliable software and hardware-integrated solutions.

EDUCATION

M.Tech Computer Science and Engineering (5 Years Integrated)	2022 – 2027
<i>Sri Ramakrishna Engineering College, Coimbatore, Tamil Nadu</i>	<i>CGPA: 7.77</i>

EXPERIENCE

Web Application Developer Intern <i>RIMES, Chennai, India</i>	July 2025 – December 2025
- Designed, developed and maintained responsive, scalable web applications using Angular, following the Software Development Life Cycle (SDLC) and collaborating in an Agile development environment, enhancing mobile usability by approximately 30–40% and ensuring cross-device compatibility across mobile, tablet, and desktop screen sizes. - Developed a GeoJSON upload and export tool using Python, JavaScript, and SQL with REST API integration, contributing to product development by enabling JSON, CSV, MySQL, and PostgreSQL data exports. Reduced manual data-entry effort by 30–40%. - Implemented automation of async task processing with Flask and Redis Queue (RQ), troubleshooting application workflows and improving responsiveness by 30%. - Engineered and deployed a cloud-based Weather Dashboard on Google Cloud Platform (Cloud Computing) while optimizing API performance and deployment workflows. - Performed manual QA testing, participated in code reviews, analyzed functional test results, and contributed to the continuous improvement of application quality.	

PROJECTS

Employing LSTM Models to Detect Phishing Websites | *Python, TensorFlow, NumPy, Pandas*

- Engineered a phishing URL detection system using LSTM and TensorFlow, applying advanced programming techniques to identify malicious URLs from real-world data with high precision.
- Trained the model on 100+ URLs using NumPy and Pandas for data preprocessing, enhancing detection reliability and model accuracy.

Blockchain-Powered MedBot for Electronic Health Records | *Python, REST APIs, MongoDB, IPFS*

- Implemented a blockchain-based data system for secure and decentralized Electronic Health Records (EHR) management using MongoDB for off-chain storage.
- Integrated smart contracts, IPFS, and proxy re-encryption with REST API endpoints to ensure data privacy and controlled access via JSON-based data exchange.
- Enabled patient-controlled data sharing with role-based permissions, achieving 100% tamper-proof record management and improving access efficiency by 30%.

Falcon Deterrent System | *Python, PyTorch, YAMNet, Arduino, Docker, Git*

- Developed an AI-based sound detection application using YAMNet, a custom PyTorch classifier, and an Arduino board to trigger real-time deterrent hardware responses, optimizing deployment for offline environments.
- Interfaced the trained model's output with the Arduino microcontroller for autonomous, real-time hardware actuation, containerizing the software stack with Docker for portable, dependency-free deployment.
- Enabled real-time data processing and autonomous detection for poultry protection in rural environments, managed with Git for version control.
- Ensured operation without internet connectivity or human intervention.

TECHNICAL SKILLS

Programming Languages	Java, JavaScript, Python
Frontend	HTML5, CSS3, Angular, React.js, Node.js, Figma
Databases	MySQL, PostgreSQL, MongoDB
APIs & Integration	REST APIs, JSON, Flask
Cloud	Google Cloud Platform (GCP)
DevOps & Tools	Docker, Git
Others	Cybersecurity

CERTIFICATES

- UI/UX Design Traineeship (Maiyyam)
- Full-Stack (MERN) App/Web Development Traineeship (Maiyyam)
- Software Testing (NPTEL)
- Cyber Security and Privacy (NPTEL)
- Privacy and Security in Online Social Media (NPTEL)
- Python for Machine Learning (Great Learning)

LANGUAGES

Tamil, English, Hindi
